About Wells

When you choose Wells, you're investing in the most effective hygiene risk management program and products to protect your customers and your business.

For more than 95 years Wells has supplied the highest quality products to the food processing, manufacturing, healthcare and dairy industries throughout Australia and New Zealand.

Wells, now part of the global Vikan group of companies, supply the world's most comprehensive hygiene system through colour coded cleaning equipment and food handling tools. We also supply Vikan's microfibre cleaning systems and the amazing Vikan vehicle/transport cleaning range, critical for cleaning food transport vehicles.

Wells were the first in Australia to introduce the BST Detectable Products range to help our customers manage the risk of foreign object contamination in the food processing and manufacturing environment.

With a focus on Lean Manufacturing, GMP and continuous improvement, Wells can also assist companies large and small with their 5S program with an extensive array of custom signage and storage systems.

When you choose Wells, you're buying more than hygiene and food safety products, you're investing in the most effective risk management program, backed by Wells and Vikans' highly experienced teams.

Vikan, our specialist partner

Based in Denmark, Vikan manufactures the most comprehensive "manual cleaning and food handling system" in the world.

Vikan is the world's leading supplier of hygienic cleaning tools for the food and beverage industry and other hygiene-sensitive environments.

With headquarters in Denmark and over a century of experience, Vikan has amassed the industry's biggest bank of hygiene and regulatory insights, and used this to develop the world's most effective professional cleaning tools and advisory services. All to make sure that Vikan's customers can deliver each and every product they manufacture with pride and confidence.

When you do business with Wells/Vikan, you can count on a hygiene partner that is acknowledged worldwide for professional tools, expert advice, functional design, superior quality and a pioneering spirit.

DESIGNED & MADE IN DENMARK 

DECLARATIONS OF COMPLIANCE

Vikan cleaning tools comply with all EU and FDA requirements pertaining to food contact. Conducted by an independent accredited laboratory, Vikan migration analysis testing makes sure toxic components aren't transferred from the cleaning tools to food products.

Vikan issue Declarations of Compliance for all food-grade Vikan products, ensuring that you can meet your due diligence requirements.

For more information visit vikan.com

A history of **firsts**

Did you know that all these industry breakthroughs, some of which are now industry requirements, were invented by Vikan?

Colour coding - for hygienic segregation of cleaning tools.

Hygienic design - to make sure cleaning tools stay contaminant-free.

Ultra Safe Technology - the new standard for hygienic design of food industry brushware.

Colour coding more products, more colours

Learn More

Vikan and Wells were the first to introduce colour coded hygiene and food handling equipment to the Australian & NZ food manufacturing and processing industry.

The primary purpose of colour coding is to help prevent cross contamination. Cross contamination can occur as a result of physical factors, chemical, microbes and allergens, amongst many others. Most Vikan products are available in up to 12 colours to enable your cross contamination management program.

The colour-coded Vikan Hygienic range meets all your needs for colour-coded cleaning tool segregation, and ensures compliance with HACCP requirements as well as food safety standards that include FSSC 22000, BRC, IFS and SQF.

How it works

Colour-coded segregation helps minimise the risk of product cross-contamination from microbes and food residues, including allergens, chemicals and foreign bodies. It works by assigning cleaning tools a specific colour for use in specific areas and/or for specific tasks.

For example, red tools can be used in high-risk areas, and yellow ones in low-risk areas. Blue tools could be used to clean surfaces that come in contact with food, while green ones could be used for cleaning floors. This makes it easy to identify whether tools are in the wrong area, or are being used for the wrong task.

VIKAN HYGIENE SYSTEM

All of Vikan's food-industry specific 'high hygiene' tools are made of EU approved and FDA compliant materials and can be washed at high temperatures to eliminate germs and bacteria. All equipment is durable, ergonomic and fully moulded to guarantee easy cleaning and is available in up to eleven colours.

manufactured using renewable energy sources

VIKAN FACT

Wells is part of the Vikan group of companies. So when you choose Wells, you are supporting the great work of the Vissing Foundation.

The Vikan company is 90% owned by a charitable foundation called the Vissing Foundation. Profits are used and largely donated for medical research and healthcare, ongoing product development and research related to hygiene and the environment. Just another great reason to choose Vikan.

Broom Selection Guide

Bristle:	Extra Stiff	Soft/Stiff Combo	Medium	Soft/Split	(UST) Ultra Safe Technology
Notes:	Helps move large stubborn soil from rough floor surfaces. Can be used in wet or dry cleaning.	The 'All Rounder' for medium and small soils. Used most effectively in 'push' motion. Can use in wet or dry cleaning.	Used for finer particles and soils on smoother floor surfaces. Mainly used in dry cleaning.	Mechanically split bristle ends are excellent on powders and dry cleaning applications.	The ultimate for critical care cleaning applications, dry or wet.

Ultra Safe Technology

A Hygiene Revolution

ULTRA SAFE TECHNOLOGY (UST) is part of Vikan's ambition to create the most secure, safe and hygienic cleaning tools for the food and beverage industry.

Safest Filament Security System

- The new Filament Security Units are fully moulded as an integral part of the brush, effectively making it a one piece brush.
- The unique positioning of the filaments means the brushes clean brilliantly well.
- This feature minimises the risk of loose filaments, and thus, the potential for product rejection, recalls and waste.

Video

Hygienic Design Super Easy to Clean

- The unique brush head pattern makes the brush easy to clean and dry and improves cleaning efficiency.
- This reduces the risk of product rejection or recall due to contamination from microbes/bacteria, foreign bodies, cleaning chemicals and allergens.

Superior Technology A Safer Choice

- Vikan UST brushware provides a far superior alternative! Why?
 - ✔ The unique UST technology minimises the risk for contaminants and bacteria to collect and grow.
 - ✔ UST brushes are easy to clean, sanitise and inspect, resin set brushes are not.
 - ✔ UST is fully compliant with EU food contact legislation.
 - ✔ UST brushes are fully colour coded, resin set brushes are not.

FLOOR & WALL SCRUBS & BRUSHES

PRODUCT CARE

Always remember to hang up your broom after use on a good quality wall bracket system. Then wash, rinse, sanitise and air dry at the end of the day. You can also use hot water to straighten the bristles and extend the life of your broom.

PRODUCT ADVICE

Having problems cleaning powder or inside ribbon blenders?

Try the Vikan Angle Adjustable Brush 28/7067+ colour. Pg. 16 (above) and 1510mm One Piece Handle 28/2962 + colour. See Pg. 60

Need Help?

Complimentary & obligation free, cost effective advice & solutions for your workplace.

Wells and our authorised distributors can help you identify current and potential hygiene risks at your workplace and provide suitable cost effective solutions.

Our experienced teams are available to visit your workplace to assess your workplace hygiene, cleaning and 5S systems. This service is complimentary and obligation free.

This initially consists of a comprehensive workplace survey where we assess and document the condition and accessibility of your cleaning tools and equipment. Once complete we provide a list of recommendations aimed at improving your workplace hygiene and reduce the potential for cross-contamination, along with a lean or 5S structure around hygiene & colour coding.

Our complimentary and obligation free workplace hygiene review consists of the following:

- ✔ Cleaning Equipment & Tools Advice
- ✔ Advice on implementing 5S
- ✔ Equipment Storage & Identification Systems
- ✔ Area Colour Coding Practices
- ✔ Staff Training Requirements
- ✔ Equipment assessment visits at agreed intervals
- ✔ Potential risks for foreign objects

To book a free site survey, call Australia on 03 9699 8999, or New Zealand on 09 263 9332.

Floor Drain Removal Hook

Drain hook designed to fit grates on top of channel floor drains. The grate can then be easily and ergonomically lifted exposing drain base for cleaning.

- ✔ Reduces bending
- ✔ Avoids dirty hands
- ✔ Aids effective drain cleaning

Designed for areas where both high levels of hygiene and effective water removal are required, this squeegee can be used on all types of surfaces, including tiled and safety flooring.

How do you change a squeegee cassette?

Don't let your squeegees become unhygienic. Vikan's '2C' and 'Classic' Squeegees have a unique rubber cassette replacement system.

So keeping your Vikan Squeegee clean and functional is easy as 1, 2, 3...

Note: Wells recommends cleaning the squeegee body before inserting the new cassette.

1
Press locking tabs on ends squeegee

2
Slide out old cassette and dispose

3
Lineup cassette with squeegee

4
Insert cassette and snap into squeegee

Materials:	PP, RB	PP, RB
Temperature:	121 °C	80 °C

Designed for removing water and waste while maintaining high levels of hygiene.

Effectively remove both water and food debris from food preparation surfaces.

HYGIENIC DESIGN

The ultra hygienic fully moulded single bladed hand squeegee removes all water and soils, and features a soft flexible blade which is easy to keep completely clean.

Video

Excessive condensation becomes droplets that contaminate your product.

Video

By placing the squeegee blade against the ceiling or pipe and pulling towards you, the condensation will not only be removed from the surface but also collected safely in the condensation bottle or drained away through the telescopic handle with draining hole.

DUSTPANS & BRUSHES, LOBBY PANS & BROOM SETS

A very effective, lightweight broom that can be used for sweeping both dry and wet debris. The brush pattern is designed using 2 filament diameters. The outer row of filaments is softer than the middle row, which gives a very effective sweeping quality. The filaments under the scraping edge are angled to facilitate sweeping close to walls and corners as well as under workbenches etc. An effective scraping edge has been implemented in the design to enable loosening stubborn debris from the surface.

1.
SWEEP DEBRIS

2.
CARRY SAFELY

Sweep up and collect dry and moist debris in the same smooth, even movement. Angle-cut broom head features two kinds of bristles, and the closable dustpan has a solid contact lip to gather up debris easily and effectively.

Video

HIGH TEMPERATURE BRUSHES

HYGIENE ADVICE

High temperature food grade brushes are excellent for cleaning grills and hot plates. They're also ideal for cleaning sealing jaws on filling machines, which greatly reduces the risk of bad seals on bags and foreign objects.

The 'Perfect' Heat Seal

Detectable Teflon Tape features a Teflon-glass fabric metal detectable tape with silicone adhesive to provide a non-stick surface to heat seal against, or a slippery cover for chutes that transport foods or pharmaceuticals. This provides protection against worn tape falling into a poly bag or package and going undetected, this Detectable High Temp Teflon Tape can be identified by a metal detector before leaving the manufacturer's facility.*

Detectable High Temp Teflon Tape

Product Code:	57/MDHST
Dimensions:	30m x 75mm
Materials:	Silicone
Temperature:	-73 to +260 °C

Enables any foreign heat sealing tape in product to be detected

Fine particles of metal embedded in the Teflon

Teflon coating provides non-stick surface to heat seal against

* Detectability of the tape may depend on calibration settings of the detector and the product being processed.

TUBE & PIPE BRUSHES

Tube & Pipe Cleaning Brush

Product code: 28/5356 + colour. See Page 36.

This versatile Tube Brush is designed for cleaning pipes found in dairies, breweries and the fishing industry. Can be used with Vikan Flexible Rods 28/53515 and 28/53520. See Pg 36.

 Video

Tube Brush Selection Guide

Bristle Type:

Diameter Ø

Pipe Length

Handle Type

External Pipeworks

Notes:

Measure the internal diameter of the pipework to be cleaned.

Work out the length of the pipe and then choose your brush accordingly.

Flexible rods are great for pipeworks with bends, whereas straight handles are ideal for larger diameter straight pipework.

Don't forget to clean the external tops and around pipework in your plant also, which are often overlooked.

ERGONOMIC SHOVELS, FORKS & RAKES

ERGONOMIC DESIGN

Vikan's ergonomic food grade shovels make light work of tough jobs. Fully reinforced with an ergonomic bend, Vikan shovels reduce the need to bend over by approximately 20cm, decreasing the risk of a potential back injury.

Ergonomic Shovels (For All Applications)

Ideal for working with ice, frozen products and items of very small size, such as grain, rice, seed and small kibble.

Vikan's unique ergonomic shaft reduces back bend by 20cm when removing soil or "product" from floor level. Long handle and large blade move a lot of soil & "product" very efficiently.

The same Vikan ergonomic shaft, with a standard blade size which may be better for removing soils or product with high weight for volume. The choice is yours!

Product Code:	28/5601 + colour	28/5611 + colour

SCOOPS, JUGS & BUCKETS

 Video

Vikan's New Ergonomic Scoop, 2 Litre

Product code: 28/5671 + colour.
See Page 55.

Scoop up any dry or moist food ingredients with Vikan's ergonomically designed hand scoop. The perfectly balanced grip protects against strains, while a flat bottom keeps the scoop from rolling over on tables.

Vikan's New, Measuring Jug, 2 Litre

Product code: 28/6000 + colour.
See Page 55.

Fill, measure and pour more accurately with this cleverly designed jug. Easy-to-read transparent scales on each side let you choose your unit of measurement (millilitres, UK fluid ounces and US fluid ounces), the elongated spout and optimised handle ensure easy, precise pouring, and the wide bottom ensures stability and hygienic cleaning.

SCOOPS, JUGS & BUCKETS

Vikan 20 Litre Bucket

Product code: 28/5692 + colour.
See Page 57.

An ideal station for mixing ingredients that are stored in 20L or smaller Vikan buckets. Perfect for solid or liquid ingredients, this station is large enough to meet all your mixing needs, yet small enough to lift and transport. A bottom handle and a rounded rim and lip also allow for ergonomic, no-spill lifting and pouring. Interior contains durable beveled measurements.

The World's Best Bucket

The Vikan bucket is so full of functional benefits that it is the perfect choice for the food and beverage industry. The unique design not only makes it look different - it also delivers a combination of food safety and user-friendliness.

WASHDOWN EQUIPMENT & ACCESSORIES

Wells Vikan's range of heavy duty wash-down accessories includes water guns, couplings and fittings and hoses, designed to handle the demands of food processing and industrial applications.

ASSEMBLY GUIDE WASHDOWN GUN & FITTINGS

Vikan offer an extensive range of water guns and sprayers that be easily adapted for different host fittings and couplings.

If you're not quite sure what you require, give your Wells Sales Representative a call and they will help you select the right fittings for your gun or sprayer.

Water Guns & Sprayers

HEAVY DUTY

Ideal for cold water flushing and cleaning. An adjustable nozzle allows for focused jet or full spread. Features a steplessly variable water supply and a trigger equipped with a closing and opening device and a 1/2" clutch housing connection.

Heavy Duty Water Gun with Trigger Guard

Trigger Operated Water Gun

VIKAN 2.5L FOAM SPRAYER + JET SPRAY

Easily tackle large-scale cleaning tasks with the Foaming Set. Whether you're cleaning walls in a food processing environment or washing the floors in showers, fitness studios, pools, or more, the Foaming Set gets the job done with a constant chemical dosage (0.4-10%, depending on manufacturer's recommendations). It can handle 8 bars of pressure and has an ergonomic grip that won't slip, even when wet. Each version comes in 5 colours and has a set of 15 colour-coded nozzles for different chemical concentrations. Never allow chemicals directly through the foaming gun.

See page 66. Product code: 55/9303+

Retractable Hose Reels

PLEASE NOTE:
All hose reels come complete with wall mount bracket and handle. Outlet also comes with Nito 1/2" quick coupling (28/00701).

HYGIENE ADVICE

Floor drains in food processing facilities can be notorious for harbouring bacteria and soil.

Regular cleaning of drains will ensure a safer and more hygienic facility

See Vikan page 17.

Floor Drain Removal Hook

- Reduces bending
- Avoids dirty hands
- Aids effective drain cleaning

ASK OUR TEAM

Workplace Site Survey

Wells can help you identify current and potential hygiene risks at your workplace and provide suitable cost effective solutions.

If you have a factory audit scheduled for the near future, you'll naturally want to satisfy auditors and earn a stamp of approval for your hygiene operations.

A Wells Site Survey is a great way to improve the certainty of passing – and in fact to move beyond just passing audits to getting ahead of the field as a hygiene leader. A Site Survey involves a thorough inspection of your plant with a view to identifying and solving hygiene problems before the auditors find them.

What we check for

A Wells Site Survey is a comprehensive review of your entire hygiene operations.

Colour coding system

Do your system and cleaning tool inventory really support your risk management targets?

Regulatory compliance

Make sure your tools meet all applicable standards and regulatory requirements.

Gaps and optimisations

Identify missing tools, and improve maintenance and usage practices.

Better tools for the job?

Is there a better tool available for the job at hand?

Cleaning and tool storage

How to clean your tools and improve hygiene through proper tool storage.

Schedule your Free Site Survey today

8 great reasons why you should schedule a Wells Site Survey today:

1. Improve and standardise your hygiene setup
2. Get a complete overview of your cleaning tools
3. Implement Wells 5S Shadow Boards and storage systems to keep your tool programme organised and safe.
4. Implement a colour coding plan or update your existing one
5. Prepare more effectively for audits
6. Rationalise your cleaning tool deployment
7. Solve specific cleaning challenges
8. Move hygiene further up the agenda at your plant.
